Changeovers

- Small to large straight-line and 4/6 corner boxes
- Complex box types such as autobottom boxes
- Specialized tray tooling for tiny boxes

- Mass production of heavy corrugated boxes is better done on a finishing line with a VIRTUO Automatic Packer

- Corrugated boxes are not compatible with the INH. These carton and box types can be processed with the INH in bypass mode. Optionally your sales manager may recommend an ERGOSA configuration that includes the IN2 box turner instead of the INH.

Multi-Row, Multi-Layer Case Configurations

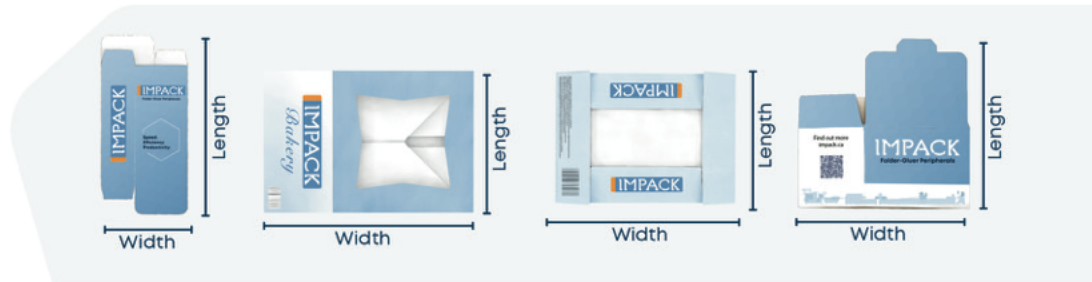

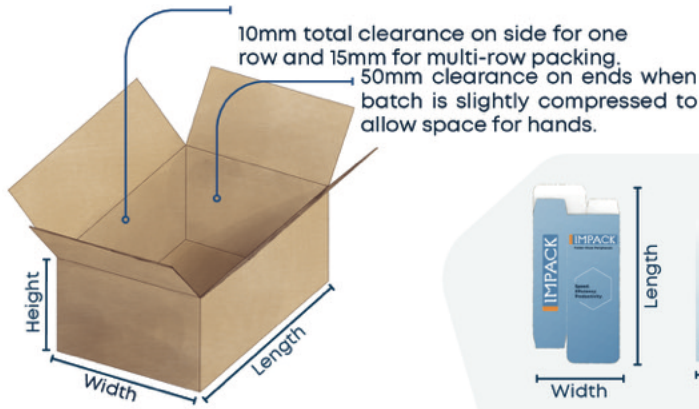

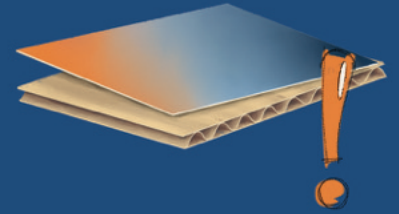

COMPETITIVE ADVANTAGE

Optimized packing of any box type

10mm total clearance on side for one row and 15mm for multi-row packing. 50mm clearance on ends when batch is slightly compressed to allow space for hands.

		Box	Case
Width	Min.	75 mm / 3 in	115 mm / 4.5 in
	Max.	650 mm / 25.5 in	710 mm / 28 in
Length	Min.	75 mm / 3 in	150 mm / 6 in
	Max.	650 mm / 25.5 in	760 mm / 30 in
Height	Min.	N/A	100 mm / 4 in
	Max.	N/A	495 mm / 19.5 in

Length and width above determined by how the box exits the folder-gluer. Dimensions depend on configuration and packing mode. Other box dimensions are possible upon analysis.

*The INH cannot turn corrugated boxes. Corrugated boxes can be handled in Hand Packing or Vertical Mode which bypasses the INH. Talk to your IMPACK Sales Manager if corrugated boxes account for a high proportion of your product mix.

The orange box shows the total space needed to accommodate all modes.

Dual Hand Packing Mode

2 m / 6.4 ft
